A SHORT PRESENTATION

I am a technology freak, a hardcore gamer, and recently received my BFA from the "Bezalael Academy of Art and Design", in the Animation Department.

I have over six years experience in design and animation, specializing in UI/UX, Web Design, Flash Animation and 3D Modeling/Animation (with a focus on Art & Design). In addition, I enjoy familiarizing myself with new industry practices and tools, engaging in new opportunities and facing new challenges.

I am a perfectionist, bringing my passion for quality to all aspects of my work and life. My goal is to always improve and build upon my skill-set with each endeavour and to always be a great asset to have in any studio that seeks such talent.

EDUCATION & COURSE

Learning new stuff, doing new things and facing new challenges makes me better...
